

**Kipos®**   
Geolife® technology

**Complete natural bioactivation  
programme for your vegetable  
garden, up to 100 m<sup>2</sup>.**

**Kipos®**   
Geolife® technology

## OBJECTIVES

### ON SOILS

**Making nutrients  
available**

**Activating proper  
microbiology**

**Foster soil  
structuration**

### ON THE PLANT

**Restore  
soil-plant balance**

- Restart a proper nitrogen cycle
- Increase the nutrients bioavailability
- Express ground potential
- Catalyse useful microbiology naturally available in the soil
- Increase stress resistance and promote soil-plant exchanges
- Boost the optimal transformation of organic matter
- Enhance nutrient retention
- Help recovery after stress
- Increase photosynthesis
- Regenerate the roots
- Strengthen the immune system
