

**Synthetos®**  **SWISS  
MADE**  
Geolife® technology

**Natural solution for optimised  
composting of garden and  
kitchen waste, up to 3m<sup>3</sup>**

**Synthetos®**  **SWISS  
MADE**  
Geolife® technology

## OBJECTIVES

**Making nutrients  
available**

**Activating proper  
microbiology**

**Foster soil  
structuration**

- Optimization of composting processes
- Odorless and leachate-free composting
- Stimulation of aerobic and anaerobic microbial processes, which increases the waste decomposition rate within a shorter span
- Rapid mineralisation, humification and complete maturation of compost within 4-6 month
- Degradation of lignite in the processed material
- High and immediate availability of nutrients
